

VRIS UPDATE

Best Practices for Administration of the ASSET Test Effective 1/4/2008 Number 128

SUMMARY OF UPDATES

The Best Practices for Administration of the ASSET Test has been revised in the Job Planning Resource Guide on VRIS. The revisions were made to clarify utilization of the ASSET as a placement tool or as an Ability to Benefit Test.

If the client is completing the ASSET as a placement tool and needs to retake the ASSET the retest criteria must be met. The client completes only the sections of the ASSET in which they did not meet cut-off scores.

If the client is completing the ASSET as an Ability to Benefit Test (see definition in updated ASSET Best Practice Guide) the client will need to complete all sections of the ASSET even if they originally met cut-off scores on one or two of the sections when they were first administered the test.

VRIS POSTING

The update can be found on VRIS:
