

VRIS UPDATE

Documenting Borderline Intellectual Functioning in QUEST Effective 5/12/10 Number 270

SUMMARY OF UPDATES

To more effectively document Borderline Intellectual Functioning on the Impairment Screen in a consumer's QUEST record, borderline intellectual functioning (IQ 71-84) has been added to the Mental Functioning-Developmental value list in QUEST. Previously, the instructions were to select mental retardation-mild and add the label Borderline Intellectual Functioning in the field below the QUEST impairment field. The Eligibility and Transition chapters have been revised to reflect this change.

VRIS POSTING

The Eligibility Chapter is posted to VRIS: Program Manual: Employment Program: [Eligibility](#).

The Transition Chapter is posted to VRIS: Transition Program: [Transition Chapter](#).
