

VRIS UPDATE

PHYSICAL CAPACITIES FROM UPDATE

Effective April 17, 2014

Number 389

SUMMARY OF UPDATES

The Physical Capacities Form has been revised. The instructions for completing the form have been moved above the impairment so when medical staff completes the forms they can include the impairment as well as the client's physical capacities. The examiner's title has been added to the signature line.

One office is sending the Physical Capacity Form when requesting medical information and medical staff are completing the form at no charge. The revision on the form allows staff to have a medical signature and diagnosed impairment so the information can be used for eligibility and planning.
